

UIPM NATIONAL COMPETITION KIT

by

UIPM NATIONAL COMPETITION KIT

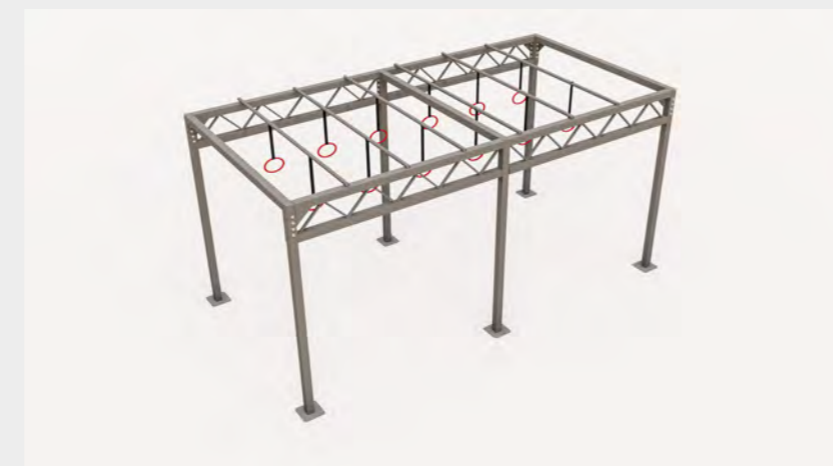

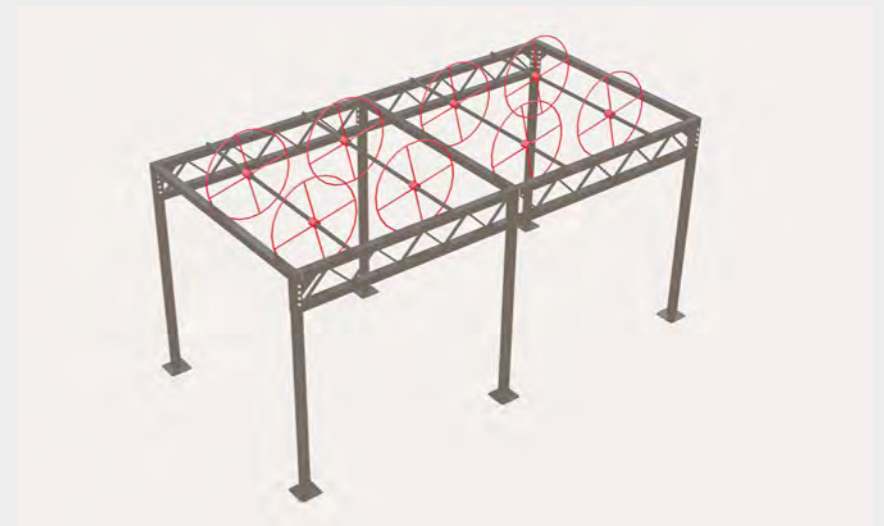

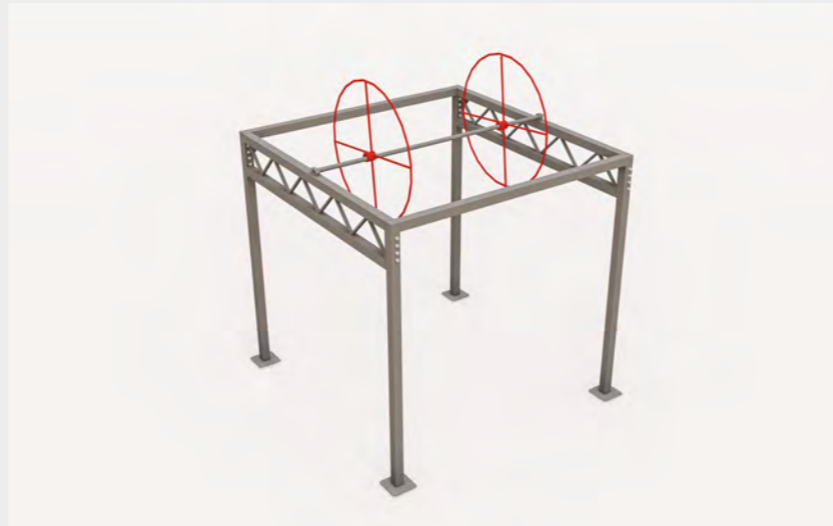

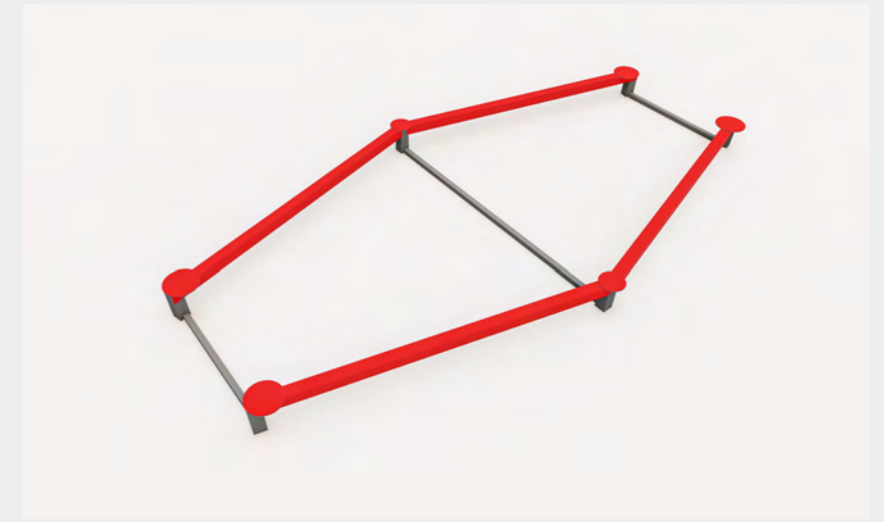

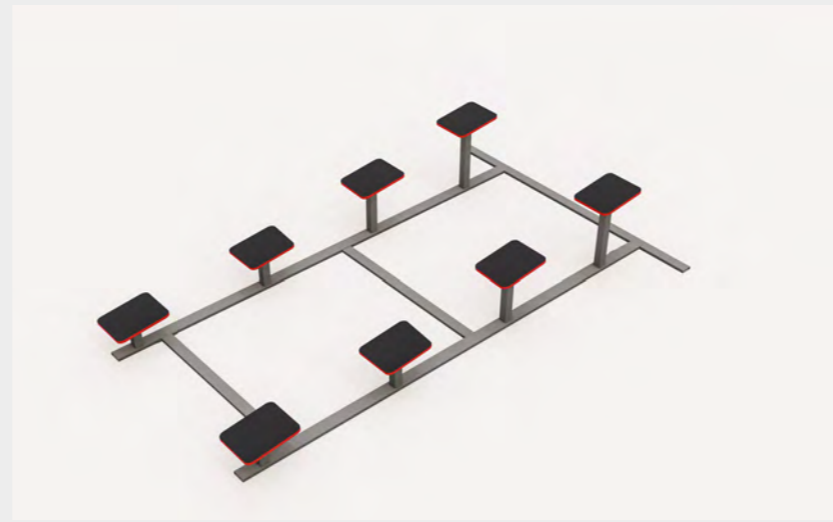

The UIPM NATIONAL COMPETITION KIT boasts a robust steel framework built for durability. Its design prioritizes versatility, allowing seamless adjustment to meet the specific requirements for national and regional competitions.

The use of a modular system with standardized pieces simplifies assembly and enhances adaptability. This approach ensures crucial stability for any structure. The incorporation of 3-meter-long pieces streamlines construction, transportation, and storage processes while maintaining exceptional strength.

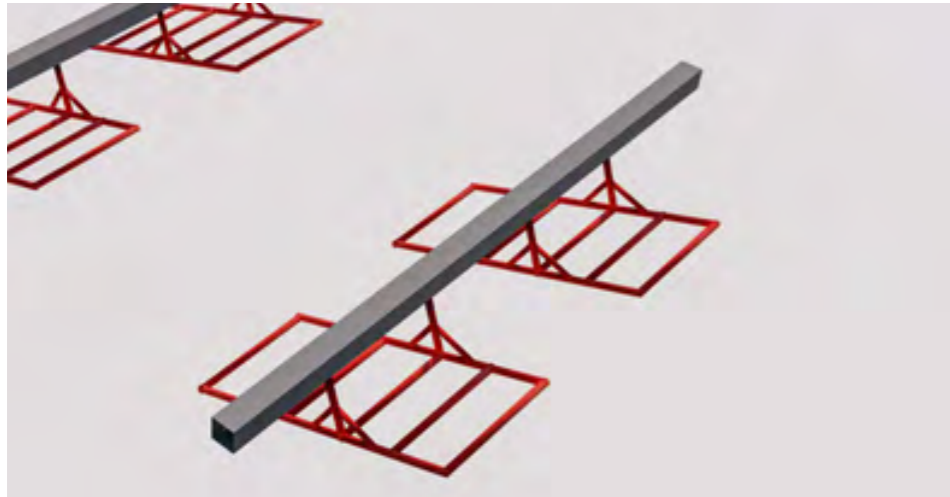

The steel bars are hot dip galvanized in accordance with the norm EN ISO 461 and the structure bars have a rectangular section of 80mmx80mmx3mm.

OBSTACLES

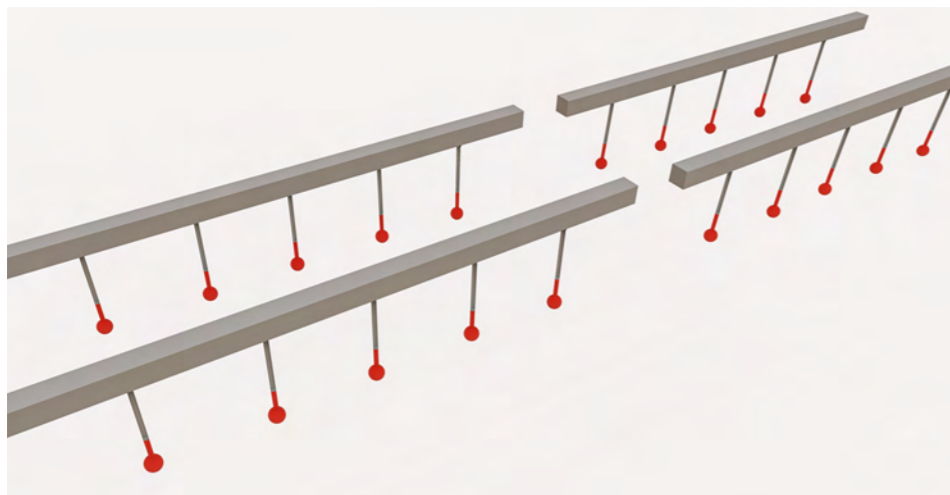

- Steps
- Big Wheel
- Wall 1.5m
- Rings
- Balance Beam
- Wheels
- Monkey bars
